

7 reasons for new windows;

Windows are versatile: They can reduce energy costs, improve the indoor climate, reduce noise, deter thieves - in short: they noticeably improve the quality of life. Important requirement: The quality must be right. Our high-quality product range offers you windows made of solid wood, plastic, aluminum or an aluminum-wood combination. Each product is available in different security levels and sound insulation levels and can therefore be individually adapted to your requirements. We are happy to help!

1. Reduce energy costs

Low energy consumption protects the environment and reduces costs. Therefore, high-quality windows with high insulation performance are of great importance for the energy balance of your home. With our high-performance energy-saving windows made of plastic, wood or an aluminum-wood combination, the heat stays where you want it. This saves resources and a lot of money!

2. Reduce noise

Noise can make you sick. Therefore, effective sound insulation in living and working spaces is extremely important! The level of attenuation required can vary from room to room. Our modern soundproof windows with different attenuation levels ensure pleasant silence in your home or office. We are happy to help!

3. Increase security

he risk of theft increases, especially in the dark season. When it comes to a safe home, robust and long-lasting security windows come first. First-class workmanship and high technical standards are particularly important. Our security package when it comes to windows: striking plates screwed to the frame, anti-theft pins in several places and a twist-proof handle with puncture protection. Different security levels are available.

4. Improving the quality of life

Windows are much more than the eyes of a house. They also have a big influence on what goes on inside. High-quality windows support a healthy indoor climate, reduce stress through reliable noise protection and protect your home from intruders thanks to advanced security technology. This makes one thing clear: first-class windows make a lasting contribution to improving the quality of life and therefore the quality of life. Let us advise you!

5. Improving light distribution

Windows bring light into the house and the right light is known to be balm for the soul. That's why light-flooded architecture with large window areas is also very popular. We would be happy to advise and support you with your building project regarding window construction and lighting concepts.

6. Install climate protection

Anyone who throws their money out the window not only harms their own account balance, but also the environment. Our energy-saving windows with high-quality triple thermal insulation glass and a high-quality sealing system help ensure that the heat remains loss-free and climate-friendly. This not only saves money, but also resources.

7. Increase in residential value

Anyone who builds or renovates a house creates something for generations. The right windows are crucial to ensuring that a building remains in excellent condition for a long time. Because both perfect assembly and the best quality in terms of sealing and workmanship have a measurable effect on the building structure. But the perceived impression is also important: the quality of really good windows is clearly visible - a big plus point for the external appearance.
